The current entry door is not the original door. It is a flat slab with another, thinner, veneer slab attached to it so that it fits the door frame. (It was retro-fitted to fit the frame.) The door has no panels or any type of decorative aspect. The direction/swing of the door was reversed (the kick plate is on the interior side) and it has cheap hardware. (See "Current Door" attached photos.) We would like to replace the door with a door that matches the style and period of the home. (See Simpson door attached photos.)

The new door, from Simpson Doors, will be the same size as the existing door (42"x82"). The wood species will be douglas fir and it will be stained traditional mahogany. It will have a leaded glass window (pictured below).
