5437 N Meridian Proposed Site work

Bigelow Residence

We will be completing two projects in the back yard of the property. First we proposed to install a new fireplace with storage on each side and a cedar pergola above. The storage doors will be made from wood to match the mantle and the pergola. The fireplace is designed to match the existing fireplace on the front of the house only at a smaller scale. It will be constructed out of brick that will match the house in color and style. We are proposing slate paving to go around the fireplace and under the pergola. The slate will match the existing material on the side porch on the south side of the home. The pergola will go over the top of the slate patio with four brick piers to enclose the posts. In order to install the fireplace, pergola and patio we will be removing two small crab apple trees.

Secondly we will be constructing a built-in grill out of brick that will match the existing retaining wall in style and color. The proposed built-in grill will have concrete counter tops with a dark stain applied. We are also proposing to stain the existing concrete patio the same color as the countertop for continuity.
